DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, 5-8, drawn to a first polyester film.

Group II, claim(s) 3-4, 9-12, drawn to a second polyester film.

The inventions listed as Groups # do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

According to MPEP, PCT Rule 13.2, Unity of Invention exists only when there is a technical relationship among the claimed inventions. The expression "Special Technical Feature" is defined in PCT Rule 13.2 as meaning those technical features that define a contribution which each of the inventions, considered as a whole, makes over the prior art.

The special technical feature in the instant application defined by claims 1-12 appears to be a biaxially oriented polyethylene terephthalate film with a high Young's modulus in both machine and transverse direction, suitable for magnetic media. Lack of unity exists because the common element to the inventions has been anticipated by the prior art as disclosed by ASAKURA ET AL (US 6,197,430).

Since the common feature to the inventions has been shown not to be unique over the prior art, and because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the different classifications, restriction for examination purposes as indicated as proper.

2. During a telephone conversation with Mr. Kuvovcik on 9/24/2008, a provisional election was made with traverse to prosecute the invention of Group I, claims 1-2, 5-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-4, 9-12 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Objections

4. Claims 1-2 are objected to because of the following informalities:

In claims 1-2, the phrase "a difference" should be changed to "the difference" to clarify the claims.

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-2, 5-8 are allowable over the prior art of record.
6. The following is a statement of reasons for the indication of allowable subject matter:
- The prior art of record fails to disclose or suggest a biaxially oriented polyester film having the recited Raman crystallization index (Ic) in the thickness direction and the recited variation of Ic values.
